FEMM Training

228 TEACHERS
TRAINED

200 DOCTORS
TRAINED

274 COURSES &
WEBINARS

In 2020, FEMM trained teachers increased by more than 50%, and trained doctors by 20%. FEMM welcomed 68 new medical providers, including nurses, nurse practitioners, and medical students, a majority of whom are in the OBGYN field.

“My patients love having access to a tracking app that’s free, which they can download right away. Other methods can sometimes take more time to learn and understand. FEMM provides the same science backed methods in a way that’s very user friendly.”

- Dr. Danielle Kosestner, DO,
FEMM Medical Practitioner

“This app is wonderful. I am so grateful to have found a program that treats the whole person. I would highly recommend this to any woman in any state of life.”

- Brigid Hoagland, FEMM app user

Research

FEMM collaborates with the RHRI

The Reproductive Health Research Institute (RHRI), collaborated with FEMM to publish two new articles in peer-reviewed journals.

FEMM contributed to research on the effects of Covid-19 with the release of a new article demonstrating better Covid-19 outcomes for women who ovulate. The research found that the key factor in the disparity between male and female outcomes may not just be sex, but hormone levels and ovulation. The evidence shown supports the idea of ovulation as a sign of health and that reproductive health can never be separated from overall health.

More articles can be found online at www.femmhealth.org

“Because of FEMM, my patients benefit from an earlier, faster, and more accurate diagnosis. The preventive focus allows for early treatment and modification of disease risk factors.

FEMM has made a huge difference in my practice and in the lives of my patients.”

- Summer T. Holmes Mason, MD, FACOG, Obstetrics and Gynecology
